

DEXTERS' REPORT OF GOLD BILLION

May Run Shows a Gratifying Increase Over April.

DAILY-WEST'S GOOD RECORD

BIG THUNDER MOUNTAIN DEALS
CLOSING TODAY.

WITH the arrival yesterday of gold bars valued at \$4,000 and cyanide product of the value of \$2,000, the Dexter company was in possession of the figures showing what the total production for May amounted to. The exhibit is a good one and it cannot fail of a hearty welcome on the part of the shareholders. Including the \$3,200 net in on the 15th, and the \$2,000 received on the 25th, the total is shown to be \$12,000, an increase of \$2,000 over the April record, and that without counting the \$2,000 worth of slimes that were not forwarded, as they were not yet ready for shipment.

DAILY-WEST'S GREAT RECORD.

Superintendent Kirby Says The Herald's Estimate Was Correct.

After rounding out the greatest month's production in the history of the property, Superintendent John A. Kirby of the Daily-West, came down from camp last night. He stated that during May there was just about 6,000 tons produced, and while he declined to give the figures, he admitted that the Herald's estimate of \$300,000 made Sunday morning, was very close to the mark. Mr. Kirby also stated that the mine was in the very pink of condition, and he had no doubt that the record for June would be just as good as the month just closed.

At the directors' meeting tomorrow it is confidently expected that an increase in the dividend rate will be discussed, and those best posted are sanguine that commencing next month the company will pay at the rate of 50 cents a share. Mr. Kirby made it decide to do even better than that and make it an even \$100,000, as there is no question that its earnings would justify it. Particularly, as the chances for a material advance in the value of silver, now that the Philippine bill has passed, is considered inevitable. The Daily-West is certainly making an enviable record these days and not a day of its prosperity can be traced to the splendid handling of the mine by Superintendent Kirby.

COMMENCE TREATING ORE.

The Mono Mill Goes Into Regular Commission Today.

The Mono Mining & Milling company has just received the first shipment of ore from the Mono mill. The ore was shipped from the mill at Mono, Cal., and was received at the company's office here. The ore was shipped in 100 ton lots, and the company expects to receive more shipments in the near future. The Mono mill is now in regular commission, and the company expects to produce a large amount of ore in the near future.

NEW MAP OF TINTIC.

W. P. Hardesty Has Just Received the First Consignment.

W. P. Hardesty, the well known civil engineer, yesterday received the first consignment of his new indexed map of the Tintic mining district, and its delivery to purchasers will begin today. The map is a descriptive note in every particular. It is compiled on a scale of 1,000 feet to the inch. No less than 114 prominent groups in the district are properly outlined and shown in colors. The map is a descriptive note in every particular. It is compiled on a scale of 1,000 feet to the inch. No less than 114 prominent groups in the district are properly outlined and shown in colors. INSPECTED THE BONANZA CON.

Expert Rohlfing Was Favorably Surprised With the Property.

Prof. W. H. Tibbals, C. D. Rohlfing and F. S. Morrison, who visited the Bonanza Consolidated property at Park City yesterday in company with Secretary Hughes, returned to town last night well pleased with their trip. They report that a great deal of development work has been done and without the knowledge of what the samples taken will show, Mr. Rohlfing is quoted as having expressed the opinion that the prospects for the future look most encouraging.

THUNDER MOUNTAIN DEALS.

Several Are Scheduled to Be Closed at Boise City Today.

(Special to The Herald.)

Boise, Ida., June 4.—H. Perdue, general manager of the Boise & Thunder Mountain company, will arrive in Boise tomorrow with the remaining payments due Messrs. Holcomb & Mosher on the Holcomb group. The property is in Thunder mountain, and was sold to Perdue's company for \$200,000, with a \$20,000 cash payment, and tomorrow's payment will close the deal.

The remaining \$20,000 due the Caswells on their Sunnyside property will also be paid, although it is not due until July.

Charles Saxman, a struggling miner, has sold the Widow and Oversight claims in Thunder mountain to Pittsburg parties for \$20,000. Curly Brewer,

the Thunder mountain mail carrier, has sold fifteen claims to H. L. Hollister for a large sum, \$10,000 being paid down.

Ore and Bullion.

Ore and bullion in this city yesterday, as reported through the banking house of McCornick & Co., amounted to \$34,700, as follows:

Silver, lead, gold and copper ores, \$21,500; base bullion, \$13,200.

Metal Market.

Silver, 52 1/2¢ per ounce.

Copper, 11 1/2¢ per pound; New York, 12 1/2¢.

Lead, \$2.50 per 100 pounds; New York, \$1.12 1/2.

MINING STOCK EXCHANGE.

Trading Is Now Down to a Skirmish For Meat Tickets Basis.

From a perusal of yesterday's figures it would seem as though business in the mining exchange was picking up. It is a case, however, of where figures can be made to fit. The record shows that 10,831 shares were sold for \$23,435. If one transfer in ten was on account of the sale of a legitimate buying order, that would certainly be the limit. Nearly every member of the exchange, or at least those who are buying, are looking to get out with their scalping knives, and in the absence of any outside lambs to be sacrificed, the market is being run by the members themselves.

There is hardly a stock or a company represented on the board that is not periodically attacked by the gentry members of the exchange. The condition as they would lay a foot or horse race. There are exceptions among them, but they are few and far between.
